Loading width (mm)	2016

Applications

The precision chippers of the DH series 812 process waste wood, wood slabs, log and preshredded root timber to different sizes of wood chips. The machines can handle trunk diameters up to 800 mm temporary.

Advantages

- Extreme engine friendly drive concept
- Variable infeed speed
- Closed, robust chipping drum produces evenly shaped wood chips - High rotor weight of more than 3 t for constant rotation speed and evenly-shaped wood chips
- Thrower driven directly by the rotor for efficient chipping and long distance throwing
- Variable blade advance and easily changeable baskets for high quality wood chips in sizes from P16 to P100 (G30 - G100)
- Protected counterknife
- Hydraulic blocking of the axle ensures stability against collapse
- Easy setup and maintenance
